Hi I have a DL2, this is the original cabinet I finally got back together, the original PS was screwed in the cab but cut, I wasn't sure how the Molex plug was attached to the 3 reds, 4 grounds, 2 whites, 1 green and 1 yellow. If anyone has a picture of how these go into the molex plug or can guide me it would get this machine going. It's the last step!
Thanks
Kevin
