Hi,

is there a way in vice (linux) (x64 / x64-sdk) to load a file if its
on hardrive as .prg ?
on pc64 (dos) it was possible to say: "drive 8 is the directory /asdasd/asdasd"

and/or how to put a fiele from harddrive as .prg inside a virtual disk .d64
without external software?
i know its possible with midnight commander (linux)
and with starcommader (dos/windows) or other tools from third party.

thanks,

simoN
