Subject: wow-just beat Xanadu II

hey List,

greetings from a godzilla free day in tokyo. i just finished Legend of Xanadu II which truly kicks butt! i wonder if i should have played the first Xanadu first though. i hope it doesn't pale too much in comparison. that will liekly be next though i think the Tengai Makyou games are next (TM III i had gotten very far in but lost the file so i will start again). i've heard and read praise for both Tengai Makyou II and Xanadu II. what are your opinions on some of the best RPGs? i love Cosmic Fantasy IV part 1, Gulliver Boy, and Exile II among, of course, the Ys games, Dragonslayer I (haven't played much of II) and many more. before i post a ranking list, what do you think. what have you played? what would you like to play that you haven't yet? finally, so now with Xanadu II...where does this fall in the Dragonslayer series? what number is this? do all the games share any common characteristics? i've played legacy of the wizard for the NES also. so, the music in this xanadu II game is great though i am surprised at how much PCM there is and how little there is off the CD. the graphics and especially in the battle are great. the 2 player mode and the VERY cool PRemium Mode are fantastic bonuses.
