I am looking for peripherals for an Apple II+/Ile system  
(I will consider a complete system, depending).

Specifically, I am looking for a daisywheel printer, an Epson  
LQ1500, and an Epson RX-80 or FX-80  
Also very interested in graphics capabilities. Specifically,  
graphics boards, graphics software (legal only), digitizers  
and display boards, also digitizing and graphics tablets.

I need to acquire a mouse, for the game I/O post, if such a  
thing exists.

I am also interested in a voice synthesizer, and analog/  
digital boards. A robotics controller card would be useful.

I will buy these items inside of (14) fourteen days, new or  
used. Either leave me e-mail if you have something available,  
(please quote me a price) or give me a call,
