Hi. A while back, someone posted a description of the format
of dBASE-II data files; could someone please mail me a copy,
or point me to any information on it (magazine articles, etc)?
I'm interested in the .DBF and index (.NDX?) files.

I'm also curious whether dBASE-III uses the same file format;
does anybody know?

Thanks in advance, as they say. Please *mail* replies and I'll
post a followup in a week or so.

    See ya!
