I think the book by Hogan which is about an intelligent machine is called "Two Faces of Tomorrow" -- I've read all of his but the most recent book (it's not out in pback yet!), & never heard of The Adolescence of P1. Two Faces of Tomorrow was indeed v. good.

If you're into bizarre physics, try The Genesis Machine, and also Thrice Upon a Time. Very convincing to me.

Now that I've raved, I'd like to know what stores have David Brin's new books, Sundiver & Startide Rising. I haven't found them around where I live, & would like to know what stores to check out before I head to "the big city." Are they out in paperback? Can you tell that I am (effectively) unemployed?? 8-)
