   I have obtained a copy of the Font Editor, but unfortunately, there
is no accompanying documentation, and I have heard that none exists. Would
anyone be willing to post or mail a brief (?) article describing exactly
how to go about creating and installing a new font? I have tried
tried to figure it out by the trial-and-error method, but it seems that if I
look at the thing the wrong way, I get a system error and have to restart.

Thanks in advance,
Mark
