Does anyone know how to add an additional Winchester hard disk on an IBM XT/370? I want to add an extra one and I'm wondering if it's feasible. I'd like some opinions before I make the investment. If you don't mind, leave a phone# and I'll call for details.

Thanx

Dave Kuhn

Well, I see no reason why not. I've already seen an XT with two IBM drives. If you plan to use the XT controller to do both drives it would be best if you moved the controller and the drives to an expansion box.
