I assume most people know by now that LNW has vanished. I found out about it when I went to get more info on their "Team" computer. It looked like an interesting machine. Does anyone know what happened to this company. Most companies that have been around as long as LNW reorganize under chapter 11 when in trouble. What happened to these guys?

LNW went bust, thats what happened to LNW. The story I was told is that their warehouse was broken into and they weren't insured - I don't know if that's true or not.
