Yes, I'm yet another MAX-80. I'm glad to hear there are others on the net. This is one of the best Z80 based machines on the market. I have one, my boss has one, and a friend has one. I hope to order another one this summer. I just got my copy of LDOS 6.2 for it. It seems complete. I won't get a chance to really test it out till summer. I should be getting the FORTRAN compiler soon. RS claims to be shipping it now. Of course if I run into any bugs with the new software, I will let everyone know. Cheers.
