I am intrested in forth on the atari. I know of the public domain Antic forth, valforth, and PNS forth. Has anyone used these? If so, which do you like and for what reasons.

I also bought logo yesterday. The documentation consists of a list of valid commands. Does anyone know how different atari logo is from apple logo. The logos were both written by the same company (LOGO inc.).

Recomendations for forth books and logo books welcome.
