Does anybody out there have anything good and/or bad to say about the Following Commodore Monitors:

1702, 1802, and 141???

Also any recommendations for a printer interface for use with a Star Micronics Gemini 10X. I'm especially interested in the lower priced models (approx. \$50). I'm thinking about the CARDCO G-WHIZ (\$51) or the XETEC SUPERGRAPHICS Jr.(\$45).

Thanks,

Fernando Botelho

I too would appreciate any recommendations on these items. May I add one more monitor? Any comments on the BMC color monitor? Also any ideas on a 1200 baud modem? ie. C= 1670, or Volksmodem II.

Happy Hunting,

Thanks,

Mike Nelson
