Well for the GBA version, I don't recall if you can use the hidden characters Devilot(Which was from Capcom's game Cyberbots.), Dan(I know he was in SFA2), and Akuma in versus mode(not the Link Battle Mode...). Is it actually possible? Because it said they can be selected in the Arcade, Master Arcade, and Versus modes. I get that it works for Arcade and Master Arcade modes, but I'm stumped if the VS Mode is either that VS Mode or Link Battle. Plz reply to this if you figured it out. If you did, then I'd appreciate the inputs. THIS IS ACTUALLY FOR THE GBA, NOT DC, NOR PSX, NOR PS3, NOR XBOX 360, BUT THE EFFIN GBA VERSION!!!!!

They can be played as actually.
(This is for GBA Version.)
When I type in CHARACTER, that means either Morrigan for Player 1, or Felicia for Player 2.

For Mei-Ling, highlight CHARACTER, hold Select and choose Hsien-Ko.
For Anita, highlight CHARACTER, hold Select and choose Donovan.

The Select Button MUST be held until the match begins for those 2 codes to work. This works in Arcade & Master Arcade Modes.

BTW, when you beat either Devilot, Dan, or Akuma in Street Puzzle Mode... You unlock them and their easier codes. Those easier codes can be then found in the Goodies Menu, which contains each of those 3.
